

City of St. Louis Residential Recycling Pick-Up Service

New Service - To divert more of our recyclables from the landfill, our City is now implementing residential recycling pick-up service on a Ward by Ward basis.

Look for these recycling containers in alleys and at curbs.

Annually, the City of St. Louis landfills approximately 200,000 tons of waste.

The City of St. Louis spends about \$6 million in landfill fees each year.
